

Labeling Solutions from ID Technology

LOGMATIX®

FOR THE **Warehouse**
ON THE **Move**

 **TECHNOLOGY®**
Labeling Coding and Marking Specialists

Implementing a well-designed barcode and labeling system in warehouse and distribution centers is effective in saving costs by increasing worker productivity and accuracy.

Identifying exact locations in your warehouse, stockroom or distribution center, enables even the busiest warehouse to keep up with changes and movement. Accurate, efficient inventory placement and picking allows for better tracking and reduced waste/loss. Logmatix® customized warehouse location labels are specially designed for use with your WMS or inventory software.

There are many types of location labels available, from small labels to fit on small bins, shelf and rack labels to placards that hang from overhead. Location labels can also be RFID enabled. Keep up with items that are frequently changed or relocated with our magnetic labels.

ID Technology provides the services to ensure a complete, successful system including printing services for custom signage, and in-house printing hardware and software, label templates, blank labels, custom printed license plate labels and printing ribbons.

Whether you are in the beginning stages of planning the layout of your warehouse or you are upgrading your WMS, our experienced team can custom design your warehouse barcode label system specific to your requirements and goals.
