

PRODUCT IDENTIFICATION SOLUTIONS FROM ID TECHNOLOGY

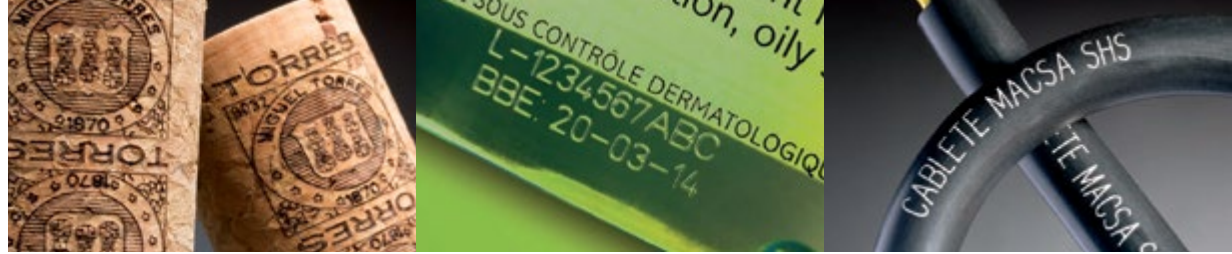

Versatility Meets the CO₂ Laser

K-Series

by

 **TECHNOLOGY**
Labeling Coding and Marking Specialists

THE LASER CODER THAT ADAPTS TO YOUR CODING NEEDS

The K-Series is the solution for marking your products with incredibly clear messages. These innovative utility lasers work with paper, board, glass and a wide range of plastics, on everything from packaged goods to industrial products. Easy to install and integrate, you can choose from a range of powers, speeds and other options to get the right product at the right price for your specific needs.

The IDT Advantage

Being an industry leader in labeling, coding and marking means ID Technology offers lower cost of ownership and the highest levels of performance and flexibility in every solution we provide.

ADVANCED CONNECTIVITY

The K-Series Laser platform features an onboard computer eliminating the need for an external computer.

SIMPLICITY

User-friendly Marca software features a full graphics interface giving you complete control of the laser and message design.

ADAPTABILITY

ID Technology offers a wide range of essential and extra accessories to optimize your laser systems performance.

K - SERIES LASERS

RELIABILITY

K-Series Lasers can be found in production and packaging facilities worldwide. You can trust the proven reliability of 1,000's of installed units. This innovative CO₂ laser is perfect for applying codes on glass, wood, cardboard, paper and plastic substrates.

VERSATILITY

K-Series Laser Coders come in a wide range of power options from 10 to 80 Watts, and micron wavelengths of 10.6, 10.2 and 9.3. Plus K-Series Laser Coders enable you to print on both stationary and dynamic packaging lines.

PRECISION

K-Series Lasers work through a combination of extremely fast mirror tracking systems for marking. Beam expander technology is used to enhance power concentration resulting in improved print quality.

ULTRA HIGH SPEED LASERS

IDT Laser Systems are no longer limited by speed. Our UHS Laser Coders utilize digital circuit boards to control the mirrors, freeing the laser to mark at super high speeds. This innovation means laser technology is now an ideal solution for high-speed production lines like those used in the beverage and pharmaceutical industries.

LASERS FOR HARSH ENVIRONMENTS

The K-Series range of lasers includes IP65 rated units. These lasers are ideal for harsh production environments subject to dust and the damp conditions of a washdown environment.

THE LABELING, CODING AND MARKING SPECIALISTS

The most valuable aspect of the IDT Advantage is the support. Our specialists stand ready to help you design a turn-key identification system that meets the needs of your production environment. No matter how big or small your labeling requirements, IDT has the Laser Coding solution

to meet your every need. And only IDT has local PMMI-certified technicians that make up our nationwide sales and service network, ensuring that you can count on ID Technology to keep you up and running.
